

## Higher Education Grants for Rhode Island

November 17, 2015

### Grants for the Identification, Preservation and Interpretation of Historic Battlefields

#### Funding Source: National Park Service

Deadline: January 14, 2016

Grants of the American Battlefield Protection Program of the National Park Service provide seed money for projects that lead directly to the identification, preservation and interpretation of battlefield land and/or historic sites associated with battlefields. Projects that involve multiple stakeholders are given preference.

### Grants for a Collaborative Network Related to Effective Trauma Treatment

#### Funding Source: Substance Abuse and Mental Health Services Administration (SAMHSA)

Deadline: January 20, 2016

Grants offered through SAMHSA's 2016 National Center for Child Traumatic Stress (NCCTS) grant program advance efforts to develop and maintain a collaborative network structure, support resource and policy development and dissemination, and coordinate the network's national child trauma education and training. The NCCTS is part of the National Child Traumatic Stress Initiative (NCTSI). The purpose of NCTSI is to improve the quality of trauma treatment and services in communities for children, adolescents, and their families who experience or witness traumatic events, and to increase access to effective trauma-focused treatment and services for children and adolescents throughout the nation. The NCCTS program seeks to address behavioral health disparities among racial and ethnic minorities by encouraging the implementation of strategies to decrease the differences in access, service use, and outcomes among the racial and ethnic minority populations served. Children of deployed military personnel have more school, family, and peer-related emotional difficulties in comparison to national samples. Therefore, SAMHSA has identified military families as a priority population under this funding opportunity.

### Grants for Travel by Women in Mathematics

#### Funding Source: Association for Women in Mathematics

Deadline: February 01, 2016

Grants of the NSF-AWM Travel Grant Program for Women administered by the Association for Women in Mathematics support both travel to domestic or foreign research conferences and, more recently, longer-term visits with a mentor. The purpose of the travel grants is to enhance the research activities of women mathematicians and increase their visibility in various research venues. On average, only a third of those applying for the \$2000 award can be supported.

## Grants for Research on the Science of Organizations

### Funding Source: National Science Foundation (NSF)

**Deadline:** February 02, 2016 Full Proposal, February 02, Annually Thereafter

September 03, 2016 Full Proposal, September 03, Annually Thereafter

Grants in NSF's the Science of Organizations (SoO) program fund basic research that yields a scientific evidence base for improving the design and emergence, development and deployment, and management and ultimate effectiveness of organizations of all kinds. SoO funds research that advances our fundamental understanding of how organizations develop, form and operate. Successful SoO research proposals use scientific methods to develop and refine theories, to empirically test theories and frameworks, and to develop new measures and methods. Funded research is aimed at yielding generalizable insights that are of value to the business practitioner, policy-maker and research communities. SoO welcomes rigorous, scientific approaches that illuminate aspects of organizations as systems of coordination, management and governance.

## Grants for Research related to Understanding and Promoting Health Literacy

### Funding Source: National Institutes of Health

**Deadline:** February 05, 2016, June 05, 2016 and October 05, 2016

Grants fund methodological, intervention and dissemination research for understanding and promoting health literacy. Research appropriate for this funding announcement includes:

- Basic research to elucidate the mechanisms underlying health literacy and to determine the causal pathways that link health literacy to a behavioral outcome or to identify the underlying components of health literacy, such as cognitive ability or other constructs/skills integral to health literacy.
- Applied research addressing issues pertinent to health literacy practices and research-in-practice.
- Intervention research to develop and test the effectiveness of strategies to improve care and health outcomes for individuals with limited health literacy.
- Intervention research to develop and test the effectiveness of strategies to reduce potentially harmful exposures by improving understanding of the link between environmental exposures and health outcomes for individuals with limited health literacy.
- Methodological and measurement research to refine constructs and to develop, validate and improve innovative methods and measures of health literacy of individuals, providers and health systems. Testing of measures that allow comparison across contexts, culture and settings are particularly encouraged.
- Public health research to improve population health literacy and elucidate and measure the role of health literacy as a contributor to health disparities.
- Implementation and dissemination research to adapt and test evidence-based practices and interventions in health care systems, communities, and diverse populations.

## Grants for Research on World Educational Systems

### Funding Source: International Education Research Foundation (IERF)

Deadline: February 15, 2016 and August 15, 2016.

Grants support projects that advance IERF's mission to research and disseminate information on world educational systems and to facilitate the integration of individuals educated outside the United States into the U.S. educational environment and work force. IERF conducts and supports comprehensive, quality research on world educational systems; shares its research findings with the international community; and provides research-based credentials evaluations and related services. IERF is pleased to name its research grant program in honor of Inez and Ludwig Sepmeyer because of their combined involvement in international education and their commitment to research and publications on world educational systems.

## Grants for Innovation in Regulatory Science Awards

Funding Source: Burroughs Wellcome Fund (BWF)

Deadline: March 09, 2016

Grants of BWF's Innovation in Regulatory Science Awards program provide up to \$500,000 over five years to academic investigators developing new methodologies or innovative approaches in regulatory science that will ultimately inform the regulatory decisions the Food and Drug Administration (FDA) and others make. This would necessarily draw upon the talents of individuals trained in mathematics, computer science, applied physics, medicine, engineering, toxicology, epidemiology, biostatistics, and systems pharmacology, to name a few. These awards are open to U.S. and Canadian citizens or permanent residents who have a faculty or adjunct faculty appointment at a North American degree-granting institution. Awards are made to degree-granting institutions in the U.S. or Canada on behalf of the awardee.

## Grants for Research that Impacts Older Americans

Funding Source: Retirement Research Foundation

Deadline: Ongoing for Letter of Inquiry. Deadline: February 1, May 1, August 1

Grants of the Retirement Research Foundation fund research projects that have a regional or national impact on older Americans. Of particular interest are projects that:

- Seek causes and solutions to significant problems facing older adults through support of applied and policy research for which federal funding is not available
