

18th Century Experience with 21st Century Technology

Genesan has an exclusive relationship with Pollet SA, a world leader since 1788 in the development and manufacture of biobased and bio-engineered cleaning products. This rich history gives Pollet the unique ability to blend unmatched experience with state-of-the-art "green chemistry".

Biological Restroom Cleaner &
Odor Eliminator

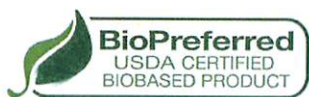

LinPol Green

Biobased Floor Cleaner &
Protectant

Delta Ultra

Multi-Purpose Power Cleaner

Advanced Technology— Industry leading technology is used to develop products containing non-pathogenic bacteria to remove offensive odors and completely remove specific soils.

Innovative Products— Patented bio-tech chemistry utilizes totally natural elements that clean but do not deplete the material source.

Streamlined Programs— Biobased cleaning agents do not use harsh, petro-based ingredients making them more versatile across a wider range of cleaning tasks.

Clean & Healthy Results— Genesan products feature in-use Health Ratings of "0" making them a safer option for students, faculty and staff.

Moving Beyond Green....

Green products are good but to truly make a difference in the world, we must move beyond simply using "green" products to employing sustainable cleaning solutions.

SUSTAINABILITY COMPARISON

LIFE CYCLE OF BIOBASED CLEANERS
18-24 MONTHS

LIFE CYCLE OF PETROCHEMICAL CLEANERS
10,000 YEARS

The earth offers a wealth of sustainable raw materials that possess natural and powerful cleaning abilities. Genesan harnesses this power in our high performance, biobased products; safer, effective and economical alternatives to petro-chemically based products.

In addition, Genesan recommends using microfiber cleaning systems with our products. This combination offers the most hygienic and environmentally responsible approach to cleaning using fewer products, less water, reduced waste and improved results.

Genesan's Commitment

We Believe:

- Sustainable cleaning products are safer and healthier for students, faculty and staff.
- Biobased and biologically engineered products offer clear environmental and economic advantages.
- In protecting the future of the planet and all the world's citizens.
- In building partnerships with businesses and universities to provide innovative solutions and products of the highest quality.

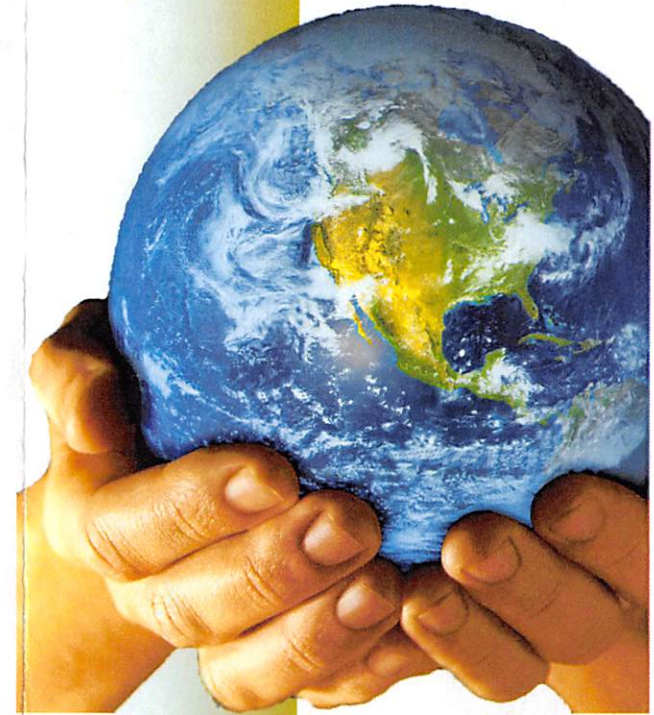

Genesan offers recyclable, closed-loop containers that ensure accurate dilution and personal safety
